

## Features

### Unique to Lifesocks™

- 1 High-stretch top for minimal compression
- 2 Flex panel for ergonomic shaping
- 3 Mesh for moisture and temperature control
- 4 Y heel for improved fit
- 5 Dorsalis Pedis pulse point device
- 6 Unique\* double density cushion padding for added protection
- 7 Individual shaping for left and right foot
- 8 Alignment points for correct positioning
- 9 Reinforced heel and toe for durability

Lifesocks™ use a natural blend of Merino and SeaCell® Active. This carefully manufactured combination provides the following unique benefits:

- Skin compatible fibers
- Antibacterial
- A healthy alternative to synthetic fibres
- Superior softness and comfort
- Temperature and moisture management
- Warmth without weight
- Ability to breathe
- Strength and durability
- Protection for superior softness and comfort

### The Elastic Support System™

Locks the sock onto the foot and the lower leg with minimal compression. It makes the sock easy to put on and ensures support under the arch.

- A snug customised fit
- No bunching or ride down
- Reduced friction

### Important Information to ensure the Maximum Benefit from Therapeutic Socks:

1. Ensure you wear each sock on the correct feet  
L - left and R - right
2. Wash the socks in luke warm water with no harsh chemicals
3. Wear the socks against your skin not over the top of garments
4. Ensure you fit socks correctly to alignment points
5. To reorder please contact SoleMate by phone or email

## Why LifeSocks™?

Socks are used for more than just padding and cushioning; they serve as a barrier between the shoe and the foot. Socks protect the skin from friction while walking or exercising. More specifically, they protect the skin from the thermal burns and blisters associated with friction.

The safer the feet are inside protective, well fitting socks and shoes, the less likely they are to be injured.

### LifeSocks™ are available in a range of styles

#### Everyday

##### LifestylePlus

A midweight sock for everyday wear. The longer cuff and higher lateral stretch make it ideal for people who need more support and protection.

#### Lightweight & Business

##### BasePlus

A lightweight version of the LifestylePlus, ideal for business or a lighter everyday style.

#### Sport

##### AirbornePlus Quarter

A shorter midweight style designed for sports and an active lifestyle.

##### AirborneLite Invisible

A lower cut lightweight sock for active people.

#### Outdoor

##### ProtectivePlus

A heavyweight sock ideal for workwear, the outdoors and adventure.

## The Forgotten Interface

LifeSocks™ are the state of the art in foot comfort, safety and in providing a healthy environment for the foot inside the shoe. Superb fit and the combination of Merino and SeaCell® Active fibres, create an optimal environment for the foot.

When purchasing socks, most people generally don't think about the total protection they provide. To be able to maintain an active lifestyle you need to look after your feet. LifeSocks™ put clever thinking back into this forgotten interface with a range of carefully engineered socks to fit your lifestyle.

### Circulation

A high stretch top makes LifeSocks™ easy to put on and ensures minimal compression. The natural regulating properties of soft merino wool ensures that your foot is well insulated and that excess moisture is drawn away from the skin, resulting in superior softness and comfort.

### Comfort and cushioning

Anatomical cushioning placed at key points throughout the sock provides added impact protection. Due to the significant pressures that your feet undergo each day, cushioning can be the difference between feet that function well and feet that develop problems.

### Reduced pressure and friction

This seamless sock provides a snug fit, meaning no excess fabric rubbing against the skin. Combined with the moisture management properties of merino wool, mesh panels for extra breathability and the hydrating properties of SeaCell® Active, it's now easy to take better care of your feet.

LifeSocks™ is a Trade Mark of Paladin Research™ owned by The New Zealand Sock Company Ltd.
